

Fly Screens

for windows

INSECT-O-CUTOR®

Comprehensive Solutions and Service

Insect-O-Cutor offers a wide range of professional quality flyscreening services designed to solve all your flyscreening problems. Screens are individually tailored for any aperture and are of robust construction made to withstand the conditions in commercial and industrial premises. Insect-O-Cutor factory trained installers have many years' experience in screening windows and doors in the food industry.

The Hinged Screen ▶

Screens are made using a polyester powder coated aluminium frame covered with PVC coated fibreglass mesh which is fire retardant. The mesh is held in place with a pliable rubber gasket designed to keep the mesh taut and secure. Screens are kept in place by retaining clips and can be easily removed for cleaning.

◀ The Sliding Screen

Comprises two or three polyester coated aluminium flyscreens, each screen moving independently in the sliding channel of the framework allowing easy movement and access to windows.

The Centre Pivot Screen ▶

A centre pivot window screened in two sections, one internal and one external. A 45° angled brush-strip completes the fly proof seal.

◀ The Box Screen

Where the design of the window is complex (such as louvre windows) a made to measure aluminium box can be manufactured to ensure that the window can still open with the screen in place.
